AS THE WOOD TURNS

October 2001

We Turned Out For Audubon's Farm Day

Wally gives a young future turner's hand a helpfull hand

A casual turner - note hand in pocket

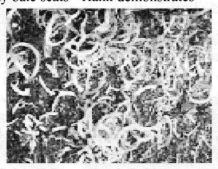

Lathes set up on platform with hay bale seats - Hank demonstrates

A young girl tries Ernie's pedal lathe

Wally thrill's the crowd with flying curly green wood chips

2001 MSSW Officers

President - Hank Cahill (781) 878-0234 Vice President - Felix Troiano (781) 749-1713 Treasurer - Wally Kemp (781) 871-1390 Secretary - Mal Partridge (781) 843-3883 Librarian - John Murphy (781) 834-1179

Newsletter - Mal Partridge (781) 843-3883

Next Meeting

Tuesday, October 23rd, 2001,7:00 P.M.
At Hank Cahill's *Dust Bowl*Refreshments by: Emilio Iannuccillo
Member Challenge: Christmas Ornament
See details inside newsletter
Demonstration: TBD

Meeting Minutes

The meeting was called to order at 7:05 pm at Hank Cahill's Dust Bowl

President's Report & General Business

Hank introduced guest Peter Toch from the *Blue Ridge Woodturners* of Virginia, also guests Greg Lawton and Paul Meehan. Greg and Paul have joined MSSW.

No correspondence was received. It was agreed that the \$15 gift certificate from Cutting Edge would be raffled off. Christmas ornaments for Signature Gallery due October 1st to 15th..

Richard Friberg received a 2nd place at the Quincy Art Festival which had five tents of displays.

Audubon Farm Day to be held on Saturday, September 29th. **Ernie** will bring his foot powered lathe.

Set up for our exhibit at Marshfield Audubon will be Friday November 2nd with reception on Saturday the 3rd. The North Bennett Street School open house is also being held on November 2nd and 3rd.

The AAW 2002 Symposium will be held June 27-30 in Providence, RI. A meeting of local woodturner volunteers will be held Saturday October 27th, 1pm-3pm, at the Biltmore Hotel in Providence.

Treasurer Wally Kemp reported \$761 in treasury.

Librarian **John Murphy** reported the library is doing a land office business - 4 books and 3 videos out - no doubt due to our new members taking advantage of the excellent choices **John** has available for learning and improving our woodturning.

Mal reported on his Gnome Engine demo at *Ocean Woodturners* in Rhode Island and he has made many additional arrangements for demonstrations while at the Aviation Heritage Festival @ Daniel Webster College, Nashua, NH, including one at New England Air Museum in Ct. next April.

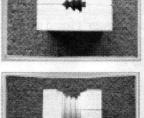

Final full size wooden Gnome Rotary Engine drawings were sent to College Park Aviation Museum.

Mal showed a sample of an item produced by a Rapid Prototyping System and a folder was available with technical information on equipment available.

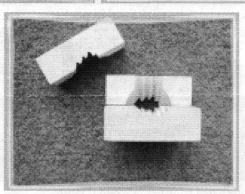

A full color copy of the newsletter was shown to members which was printed by Kinkos by mistake! If members are interested in seeing the newsletter in color, an Acrobat .pdf file can be sent via E-Mail.

The \$15 gift certificate was won by **Angelo Iafrate**. **Greg Lawton** won the monthly member turning raffle; **Frank Iafrate**'s weed pot, and will supply the turning for the next meeting.

Bernie Feinerman suggested Mal check out a German Woodturning site with an interesting turned Christmas Ornament. A good choice for the member challenge:

Welcome New Members

Greg Lawton from New Bedford &
Paul Meehan from Norwell

Laser Guided Hollowing

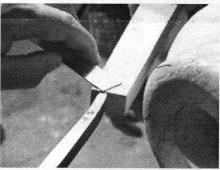

Frank Movitz explains laser guided hollowing system he will demonstrate

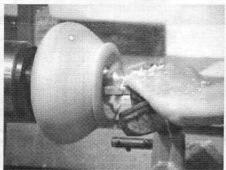

Frank shows how elongated laser spot indicates final wall thickness

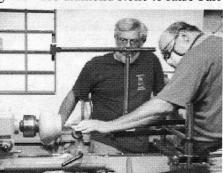

Closeup of hollowing tool tip - don't grind - use diamond stone to raise burr

Setting up laser beam outside tool tip for wall thickness desired

Hollowing proceeding - note laser spot and tool rest position

Laser pointer is clearly shown attached to bracket on tool arm

Final cut being made - elongated laser spot off to left and not in view

High tech finger/thumb caliper about to check wall thickness

Display of thinwalled bowls turned by Mike Green using laser depth guide

Mike Green explains how he hollowed this large vessel

Mike and Frank fabricated their laser guides from 7/8"stainless boat rail tubing mounted on Kel McNaughton hollowing rigs available from Woodcraft, Woburn

Note: Frank suggests keeping McNaughton rig waxed to prevent catches.

American Woodturner Fall 2001, Page 36, details a home made trapped boring bar/laser system.
